MIIS Legislation & Regulations

Legislation and Regulations

Legislation passed in June 2010, charging MDPH to establish an immunization registry (M.G.L. c. 111, s.24M)

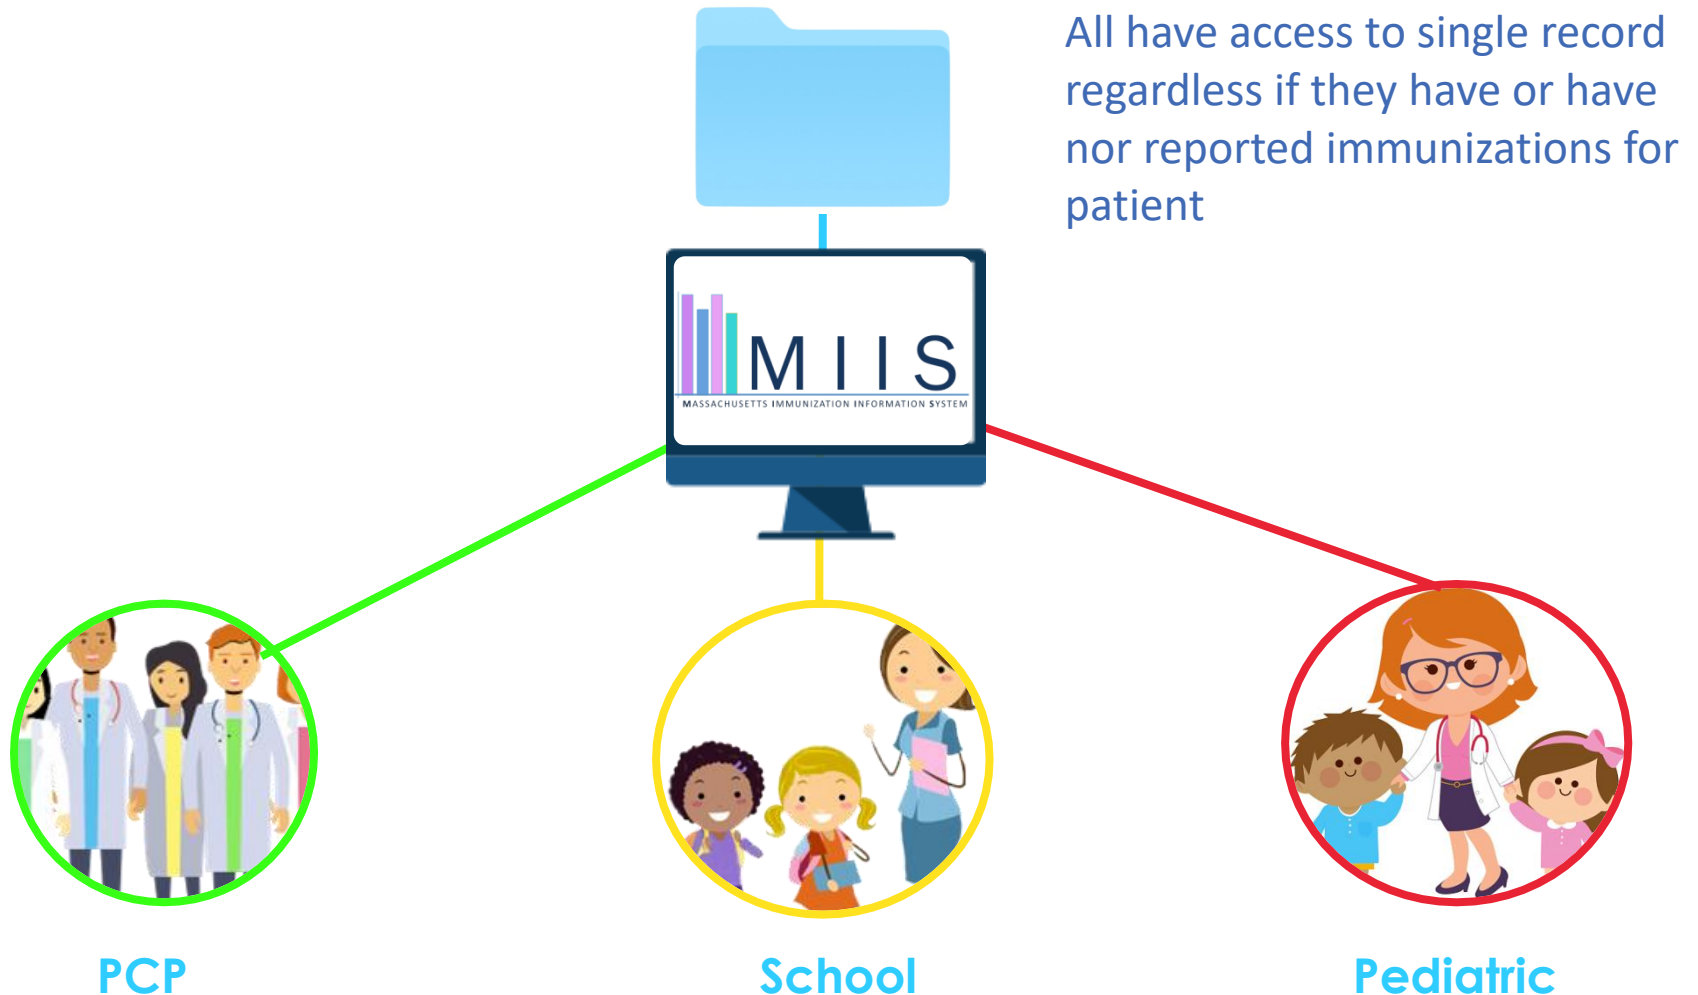

Regulations passed in January 2015, giving further details on legislation and compliance (105 CMR 222.000)

Mandatory to report all administered immunizations to the MIRS

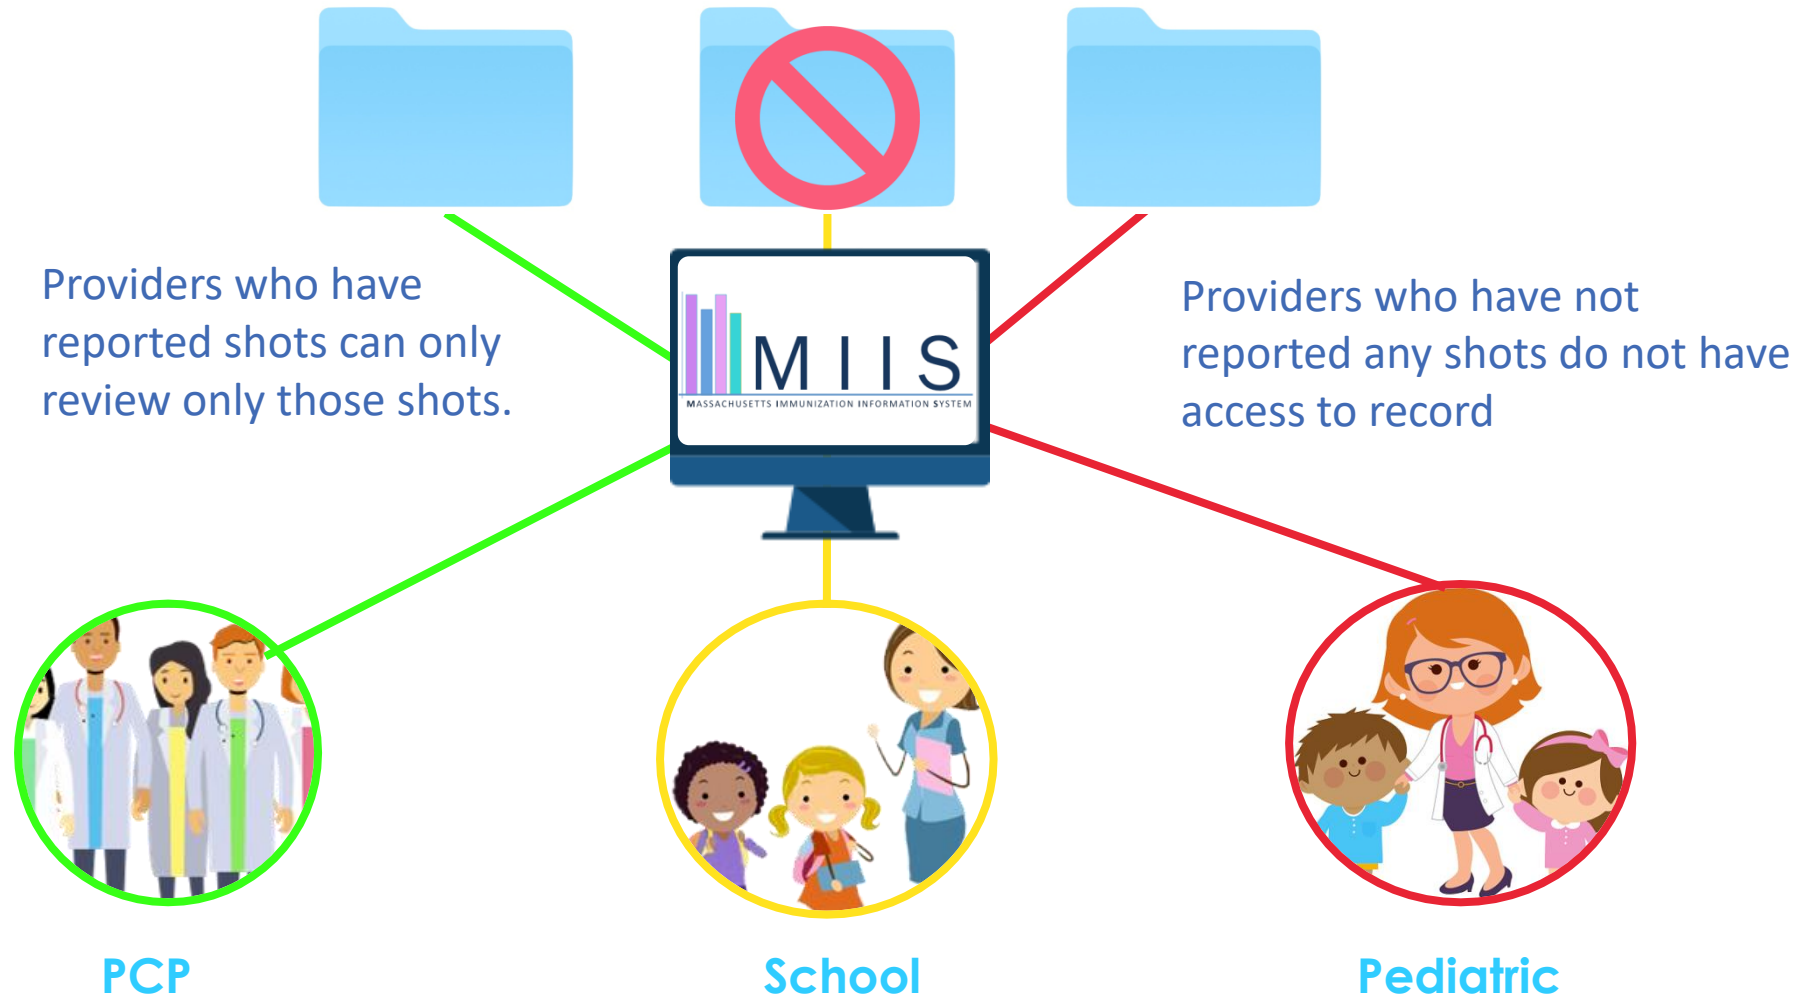

Providers' Duty to Inform: patients must be informed that their immunizations are being reported to the MIRS

Patients' Right to Object to Data Sharing: all patients have the right to object (or withdraw a previous objection) to sharing their immunization data within the MIRS.

Data Sharing = YES

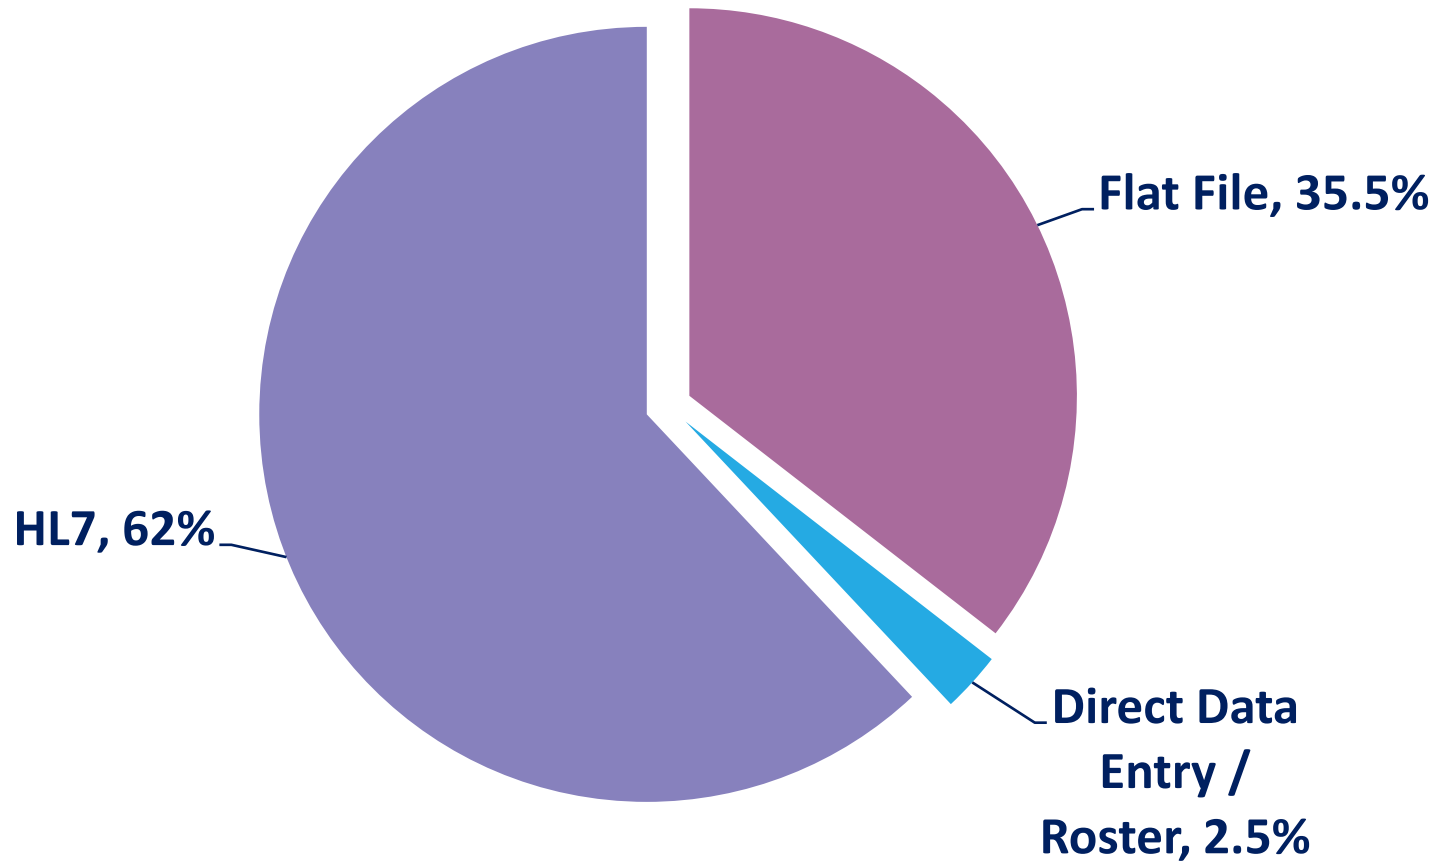

Data Sharing = NO or UNKNOWN

*Administered refers to immunizations administered at your practice. Historical refers to immunizations administered at a different provider practice.

Data Exchange Terms

HL7 (Health Level Seven)

- HL7 is a set of international standards for transfer of clinical and administrative data between software applications used by various healthcare providers.

VXU (Vaccine Event Submission)

- The HL7 VXU message is used for sending immunization events and associated patient data.

QBP/RSP (Query and Response)

- The HL7 QBP message is used for requesting immunization information. The HL7 RSP message is used for returning immunization information in response to a QBP message.

SUCCESS: Displays the total number of HL7 messages successfully received.

SUCCESS WITH WARNINGS: Displays the total number of HL7 messages successfully received but had warnings. A warning is a missing or invalid field value that is not essential for the message. Please have your technical contact review these messages, and make corrections.

ERRORS: Displays the total number of HL7 messages that failed. Failed messages are not uploaded to the system. These messages require attention and resubmission. Please have your technical contact review these messages and resubmit.

HL7 Email Next Steps

Take note of your success/error rate and message count

If the error rate is greater than 5%, contact your IT/EHR vendor to report the failures

If the message count is lower than expected, use the Trouble Shooting Missing Data Guide and report issues
